

COMPARING ART

1. What did you notice about the styles and looks of the different pieces of art? What was similar? What was different (other than the type of art you looked at)?

2. What were the different artistic works about? What kinds of themes did they each address? What was similar about the art? What was different?

3. What kinds of themes emerge for you as you look at all the art together? What do you think these artists are trying to tell us about black people and their experiences?
